THE VINTAGE

2023 was full of contrast! Warm temperatures at the beginning of winter, then a return to normalcy until February; Spring was characterized by a persistent drought and strong wind, followed by regular rainfall until the end of June. Our winegrower partners have worked a lot in the vineyards to preserve the grapes. At the beginning of the harvest, berries were healthy and well-ripened, promising one of the finest vintages of the past decade.

IN THE VINEYARD

Sand, marl, and clay-limestone soils on the "Saint Veran" area, one of the historical cradle of Muscat de Beaumes de Venise.

WINEMAKING

Special attention is given to the vinification of this Muscat, whose grapes are grown and vinified in accordance with the specifications for organic wines. The harvest is carefully cooled to below 10°C to preserve the grape's qualities. Cold skin maceration for 8 hours. Pressing, then the juices are kept cool for 1 month at 0 to 2°C. Fermentation is initiated with indigenous yeasts. Fortification ("mutage") is carried out in one step.
